

The layout suggestions below are provided as a service by Marazzi USA. The calculations are believed to be accurate and correct; however, final responsibility for pattern calculation and usage rests with the user. Tile calibers should be synchronized within patterns using more than one tile size. Always lay out at least four interlocking samples of the pattern chosen and obtain acceptance by customer before installation. Shaded areas indicate pattern repeat.

Size	Percent
a = 6½" x 6½"	11.11%
b = 6½" x 13"	11.11%
c = 13" x 13"	22.22%
d = 13" x 20"	22.22%
e = 20" x 20"	33.34%
